This app is perfect for Instagram, Instagram, Instagram users love sharing images with text overlays. You can get very creative with this tool. Here's a quick sampler of the types of text overlays you might create: Quotes – Instagram users like to share motivational and inspiring quotes. Get some quotes that are related to your niche via QuoteBrain or... So, you get some images through your camera or with free stock image sites like Unsplash. Then, upload the desired image to Over and add text with it. You can then upload it to Instagram and get a lot of shares! Stats - Do you have a surprising statistic that is sure to shock your followers? Use Oltre to add a statistic to an image and upload to Instagram. Questions – If you want Instagram to comment on your profile, the best way to do it is through questions. Ask your followers a simple but interesting question by overlaying the question text on an image. For example: an ice cream company might ask for something like, "What's your favorite ice cream flavor?" Use this tactic to do some market research or to find out if your customers have ideas for new products. Ads - If you have exciting news about your business that you'd like to share, do so by adding the ad text to an image. Make it exciting and choose a great image! 9. SocialRankSocialRank allows you to get exclusive information about your Followers on Instagram, such as who is your most valuable follower, what posts your followers share, what interests your followers have, where your followers are and much more. Basically, it's an analytics platform for your Instagram followers. This tool was previously only available for Twitter, but as Instagram's user base has grown exponentially over the past year, SocialRank has decided to make their analytics available to Instagram as well. Once I sign you up, you can access all the stats on your followers and a variety of other extras like seeing how your brand matches your competitors and filtering your followers based on interest, activity, and location. Overall, I think this tool is a fantastic platform that you can use to see who your followers really are. Behind the number, there is an audience of real people. SocialRank will help you identify with your followers and create Instagram posts that will resurpass with them.10. Pic StitchSometimes, the best Instagram photos are collages that include multiple images, all crushed into one photo. Creating a collage saves time and saves your followers from receiving multiple images all at once. For example, if your company hosted an event and you had photos that you would like to share, you might create a collage of the images of that event. Creating collages takes your Instagram profile to the next level. The best and easiest way to create collages is with Pic Stitch, a mobile app. This is especially useful and better than other photo collage creators, because it can be used on the go. When you're at an event, you can just use app to create the collage, and then upload to Instagram. There is no confusion, no online editors are needed and everything is done in a few minutes, if not seconds. Seconds.
